

STORAGE RACK

VFCR1701D

Our BodyKore VFCR1701D Display Storage is a space efficient, customizable, and comprehensive storage system that is attachable to our Full Linx Rack Modular System. It consists of two base storage units with mounting channels for shelving height adjustments, an extended overhanging pull-up bar, and the option to anchor to the floor or wall. Eliminate clutter and free up more floor space to improve the exercise experience.

An organized gym helps everything run smoother. The Display Storage Unit is where it all comes together. With plenty of room for all your training equipment, this one piece does the work of multiple dumbbell racks and storage closets - but in an upgraded, single unit. By utilizing a smart vertical design, storage rack gives you a huge amount of storage in a footprint only 41" wide. Designed to be configured to store a wide variety of accessories.
