

The BodyKore Stacked Series Pull Down is a quality fitness equipment designed for strengthening the back muscles and arms. Sturdy steel construction with a quality finish is sprayed by electrostatic powder coating that protects the construction from scratches. This plate loaded machine features an adjustable high-quality cushioning of the seat to accommodate a variety of different user heights and the high-density foam roll thigh pad comfortably stabilizes your legs throughout each set. Handles are provided with high quality foam material to ensure greater stability and comfort during your workout.

f 🖸 🎽 🖬 🗸

The seat and cylinders for feet prop up, which are made of foam material with non-slip finish, are easy to set up which ensures higher efficiency and comfort. Both parts of the arms can be used together or separately. Precision pivot bearings provide smooth, natural reps don't feel machine resistance, only weight resistance. Nickel-plated weight plate storage bars are designed to withstand corrosion, rust, and heavy use. BodyKore's Pull Down machine is suitable for both commercial and non-commercial use.
